ON-LINE ZONING ORDINANCE DISCLAIMER

The Web version of the City of Cambridge, Massachusetts Zoning Ordinance is provided for reference and the convenience of having the Ordinance in a computer-readable format. The print version of the Zoning Ordinance, together with any amendments adopted by the City Council subsequent to the most recent update to the print version, remains the official version of the Ordinance. If any discrepancies exist between the print and web versions of the Zoning Ordinance, the print version, together with any City Council amendments, shall be considered correct. Recent amendments to the Zoning Ordinance may appear on the Web prior to being incorporated into the print version of the Ordinance.

ARTICLE 6.000 OFF STREET PARKING AND LOADING REQUIREMENTS AND NIGHTTIME CURFEW ON LARGE COMMERCIAL THROUGH TRUCKS

Text current through Ordinance #1288 of September 12, 2005

6.10	INTENT AND APPLICABILITY

- 6.20 OFF STREET PARKING REGULATIONS
- 6.30 PARKING QUANTITY REQUIREMENTS
- 6.40 DESIGN AND MAINTENANCE OF OFF STREET PARKING FACILITIES
- 6.50 PARKING PLAN INFORMATION REQUIREMENTS
- 6.60 PURPOSE AND INTENT OF LOADING REQUIREMENTS
- 6.70 APPLICATION OF LOADING REQUIREMENTS
- 6.80 REQUIRED AMOUNT OF LOADING FACILITIES
- 6.90 LOCATION AND LAYOUT OF LOADING FACILITIES

6.10 INTENT AND APPLICABILITY OF PARKING AND LOADING REQUIREMENTS

- 6.11 Intent. It is the intent of this Article 6.000 to reduce traffic congestion, noise, vibrations, fumes and safety hazards caused by large commercial trucks, thereby promoting the safety, health and welfare of the public, by establishing requirements for off street parking and loading and restrictions on the use of City street during the night-time by large commercial trucks with points of origin and destinations outside the City of Cambridge in order to implement the purposed of the The Zoning Act, Section 2A of Chapter 808, and Article 1.000. Section 1.30 of the Cambridge Zoning Ordinance, including:
 - to lessen congestion in the streets
 - to conserve health
 - to conserve the value of land and buildings
 - to prevent pollution of the environment
 - to protect residential neighborhoods from incompatible activities, and
 - to preserve and increase the amenities of the city.

The number of parking and loading spaces required herein varies according to type, location and intensity of development in the different zoning districts, and to proximity of public transit facilities. This Article 6.000 requires development of adequate parking facilities to meet the reasonable needs of all building and land users without establishing regulations which unnecessarily encourage automobile usage. The parking standards contained herein are intended to encourage public transit, bicycle usage and walking in lieu of automobiles where a choice of travel mode exists. It is also the purpose of this Article to allow flexibility in providing required parking through shared or off site arrangements in order to accommodate the automobile in the urban environment in a less disruptive way. Development regulations and design standards have been established to reduce hazard to pedestrians on public sidewalks, to ensure the usefulness of parking and loading facilities, and where appropriate, to avoid potential adverse impacts on adjacent land uses, and to enhance the visual quality of the city.

- **6.12** Applicability. The off street parking and loading provisions of this Article 6.000 shall apply as follows:
 - (a) For new structures erected and new uses of land established or authorized after the effective date of this Article 6.000 or any amendment thereto, as well as for external additions of Gross Floor Area to existing structures for any use, accessory off street parking and loading facilities shall be provided as required by the regulations for the districts in which such structures or uses are located.
 - In the case of an addition of Gross Floor Area to an existing structure (lawfully erected prior to the effective date of this Article 6.000 or any amendment thereto), which addition contains nonresidential uses, off street parking and loading facilities shall only be required when the total of such additions occurring from the effective date of this Article 6.000 or any amendment thereto increases the Gross Floor Area of the existing structure by fifteen (15) percent or more. If such an increase occurs, additional off street parking or loading facilities as required herein shall be provided for the total increase in intensity subsequent to the effective date of this Article 6.000 or any amendment thereto.
 - (b) When the intensity of an existing use within any existing structure (or lot in the case of 6.36.7 I and m and 6.36.8 f and g) is increased through addition of dwelling units, floor area, seating capacity or other units of measurement specified in Section 6.30 or Section 6.60 (but not including any uses in a new external addition to that structure, which shall be subject to the provisions of Paragraph (a) above), off street parking and loading facilities shall be provided as required for such increase in intensity of use.
 - However, a nonresidential use lawfully established prior to the effective date of this Article 6.000 or any amendment thereto shall not be required to provide off street parking and loading facilities for such increase unless and until the aggregate increase in units of measure shall equal fifteen (15) percent or more of the units of measurement existing upon said effective date. If such an increase occurs, additional off street parking or loading facilities as required herein shall be provided for the total increase in intensity subsequent to the effective date of this Article 6.000 or any amendment thereto.
 - (c) When the use of an existing structure (but not including the use of a new external addition to that structure, which shall be subject to the provisions of Paragraph (a) above) is changed to a new nonresidential use, off street parking and loading facilities shall be provided as required in the schedule of parking requirements in Subsection 6.36 and the schedule of loading requirements in Subsection 6.60. Any maximum requirements specified in Subsection 6.36, as well as minimum requirements, shall be applicable to such changes in use.

However, if said structure was lawfully erected prior to the effective date of this Article 6.000 or any amendment thereto, additional off street parking and loading facilities shall be required only to the extent that the required amount for the new nonresidential use would exceed the amount required for the previous use if said previous use were subject to the schedule of parking and loading requirements.

In either case, the first four (4) spaces required need not be provided.

(d) When the nonresidential use of an existing structure is changed to a residential use, off street parking facilities shall be provided as required in the schedule of parking requirements in Subsection 6.36. Any maximum requirements specified in Subsection 6.36, as well as minimum requirements, shall be applicable to such changes in use.

However, if said structure was lawfully erected prior to the effective date of this Article 6.000 or any amendment thereto and the nonresidential use of the structure is proposed to be changed to an Affordable Housing Project as herein defined, additional off street parking facilities shall be required as provided above, except that for that portion of the Project consisting of Affordable Units additional off street parking shall be provided at the rate of 60% of the parking otherwise required in Section 6.36.

For purposes of this Section 6.12 (d) an Affordable Housing Project shall be a residential development in which at least fifty percent (50%) of the dwelling units are considered Affordable Units for occupancy by Eligible Households as defined in Section 11.200 of the Zoning Ordinance.

- 6.13 Scope of Off Street Parking Regulations. All accessory parking facilities shall conform to all regulations set forth in this Article governing the use, design and operation of such facilities. However, the provisions of this Article 6.000, notwithstanding, any special parking requirements for townhouse developments specified in Section 11.10, for planned unit developments specified in Article 13.000, for projects in the Mixed Use Development District specified in Article 14.000 or for special permits specified elsewhere in this Ordinance shall be applicable for those projects.
- 6.14 Restoration. When an existing structure or use is restored and resumes operation after being destroyed or damaged by fire, explosion, or other catastrophe, off street parking and loading facilities shall be provided at least equivalent to that in existence at the time of such destruction or damage. If the extent of such damage is such that the cost of restoration is fifty (50) percent or more of the replacement value of the structure or use, then parking facilities meeting the requirements of this Article 6.000 shall be provided. However, in no case shall it be necessary to replace or continue any parking or loading facilities which were in excess of those required by the schedules of parking and loading requirements for equivalent amounts of new uses or construction.
- 6.15 Existing Parking Facilities. Accessory off street parking facilities established after March 15, 1961, shall not hereafter be reduced below of if already less than, shall not be further reduced below the minimum requirements under the provisions of this Article 6.000. Accessory off street parking facilities in existence as of March 15, 1961 shall only be required if such facilities have been used to satisfy parking requirements after March 15, 1961.
- **6.16** Dedicated Off Street Parking Facilities. Required off street parking facilities which after development are later dedicated to and accepted by the City and maintained by the City

- for off street parking purposes, shall be deemed to continue to serve the structures or uses to meet the requirements for which they were originally provided.
- 6.17 Compatibility with the E.P.A. Clean Air Regulations In addition to the regulations contained in this Article, all off street parking facilities must comply with restrictions contained in the Transportation Control Plan for the Metropolitan Boston Interstate Air Quality Control Region as promulgated by the United State Environmental Protection Agency to the extent the same are in force and effect.
- 6.18 Compatibility with Handicapped Access Rules. In addition to the regulations contained in this Article 6.000, all off street parking facilities must comply with the currently applicable "Rules and Regulations of the Architectural Barriers Board of the Commonwealth of Massachusetts" to the extent the same are in force and effect.

6.20 OFF STREET PARKING REGULATIONS

- 6.21 Use. All accessory parking facilities provided in accordance with this Article shall be maintained exclusively for the parking of motor vehicles or bicycles so long as the use exists which the facilities were designed to serve. Such facilities shall not be used for automobile sales, dead storage, or repair work, dismantling or servicing of any kind, with the exception of emergency service when needed.
- 6.22 Location. All accessory off street parking facilities shall be located in accordance with the provisions of subsections 6.22.1, 6.22.2 and 6.22.3. For purposes of this Section 6.22 lot shall also mean the Development Parcel of any Planned Unit Development regulated by the provisions of Article 12.000 and Article 13.000 without regard to a lot or lots that may initially constitute the Development Parcel or any lot or lots created within the Development Parcel subsequent to the approval of the PUD by the Planning Board.
- **6.22.1** Accessory off street parking facilities may be located on the same lot as the use being served or on another lot that has the same or less restrictive zoning classification as the lot on which the use being served is located in accordance with the following conditions:
 - (a) (1) said other lot is contiguous to the lot on which the use being served is located; or
 - (2) said other lot is within three hundred (300) feet of the lot on which the use being served is located and the use being served is nonresidential; or
 - (3) said lot is within three thousand (3000) feet of the lot on which the use being served is located, such use is an institutional use listed in Subsection 6.36.3b and said use is located within a five acre area containing one or more lots, contiguous except for streets, owned by a single institution; and
 - (b) said lot is not now and was not within the past five (5) years the location of a preferably preserved significant building (as defined in the General Ordinances of Cambridge) as determined by the Cambridge Historical Commission.
 - (c) however, no off site accessory parking facilities shall be allowed to meet the requirements for Subsection 6.36.5h "Theatre or hall for public gatherings".

- **6.22.2** The Board of Zoning Appeal may grant a special permit for off site accessory parking not allowed in Subsection 6.22.1 (a) provided that convenient and safe access from the parking facility to the use being served is provided in accordance with the following conditions:
 - (a) No off site accessory parking facility may be located on a lot which has a more restrictive zoning classification than the lot on which the use being served is located.
 - (b) Off site accessory parking facilities shall be located within four hundred (400) feet of the lot being served for residential uses and within one thousand (1000) feet of the lot for other uses.
- 6.22.3 Accessory bicycle parking spaces required under the provisions of this Article 6.000 must be located on the same lot as the use being served or a contiguous lot in the same ownership.
- **6.22.4** Accessory off street parking spaces required under the provisions of this Article 6.000 need not be in the City of Cambridge.
- 6.22.5 Distance Measurements For Parking Facilities. In all cases where distance measurements between a lot and off site parking facilities or other specified area are specified in this Article 6.000, such distance shall be measured as a straight line from the nearest point for the lot on which the off site accessory parking is located, to the nearest transit station entrance, or to the nearest street line or other boundary of another specified area.
- 6.23 Control of Off Site Parking Facilities. Where accessory parking facilities are allowed on land other than the lot on which the use being served is located said other land shall be in identical ownership or binding commitments shall exist to guarantee, to the reasonable satisfaction of the Superintendent of Buildings or to the special permit granting authority, that the off site parking will continue to be available for the period during which the use or uses that the parking serves may be expected to be in existence. Such commitments shall be evidenced by negotiated lease agreement, recorded covenant or comparable legal instrument. Such instrument shall be duly recorded at the Middlesex County Registry of Deeds and certification of such recording provided to the Superintendent of Buildings or the special permit granting authority.

6.30 PARKING QUANTITY REQUIREMENTS

- 6.31 Required Amount of Parking. Off street parking facilities shall be provided for each use of a lot or structure in the amount specified in the schedule of parking requirements contained in Subsection 6.36. Said schedule specifies the amount of accessory off street parking required for each type of land use listed in "Table of Use Regulations" in this Ordinance. The amount of required parking is also based on the intensity of development permitted in the district in which the use is located.
- **6.31.1** The schedule of parking requirements in Subsection 6.36 specifies the unit of measure requiring the provision of one parking space. Square footage requirements are geared to

- gross floor area. Each unit of measure, however, shall specifically not apply to any Gross Floor Area devoted to parking facilities, which shall not require the provision of any accessory parking.
- 6.31.2 In general the schedule in Subsection 6.36 specifies a minimum requirement, but in some instances a maximum amount of parking is stipulated [Example: for a general office use (6.36.4 d) in a Business C district, the minimum requirement is one space per 800 square feet of gross floor area and the maximum is one space per 400 square feet of gross floor area.] Where there are two such listings the first is the minimum requirement and the second is the maximum limitation. Relief from both the minimum parking requirement and maximum parking limitation may be obtained only after the grant of a special permit as provided in Section 6.35 below. With the grant of a special permit the maximum parking limitation may be exceeded provided, however, that the provisions with regard to gross floor area as set forth in Section 6.31.3 are met.
- 6.31.3 Any parking spaces provided in excess of the maximum requirements specified in Section 6.36 shall be counted in determining Gross Floor Area. In such cases a proportional share of the entire parking facility (not only the area of the spaces) shall be credited toward Gross Floor Area. The area counted as Gross Floor Area shall be determined by multiplying the total area of the parking facility by the percentage that the proposed number of spaces exceeds the maximum allowed number of spaces.
- **6.31.4** For uses not listed in Subsection 6.36, the Board of Zoning Appeal shall determine the required amount of parking if it issues a use variance for such use.
- **6.31.5** All commercial uses shall also be required to provide a parking space for each commercial vehicle customarily used in conjunction with the operation of such use at such location.
- 6.32 Parking Exemptions
- 6.32.1 Small Business. The minimum amount of parking required by Subsection 6.36 Schedule of Parking and Loading Requirements shall be waived for any nonresidential use in an office, business, or industrial district if such use would require four (4) or fewer spaces. However, such nonresidential use shall be located in a building or row of attached buildings which contains a total of ten thousand (10,000) square feet or less of gross floor area devoted to nonresidential use.
- 6.32.2 Institutions. Where an institution provides dormitory, fraternity, faculty, employee or other residence accommodations, the number of parking spaces provided as a result thereof may be deducted from the requirements established to satisfy the needs of classrooms, libraries, lecture halls, laboratories, similar educational areas or dining facilities normally used by such residential occupants. In order to qualify for such deduction, the institutional applicant shall submit to the Building Department the institution's current residential parking plan clearly indicating the location of all existing and proposed residential parking facilities available at the institution.

- 6.33 Computation. Where a building or lot is used by two or more activities that fall into different classes of use in Subsection 6.36, the off street parking required shall be the sum of the requirements for each individual use. Required parking spaces for accessory uses shall be determined in the same manner as for principal use. Where the computation results in a fractional number, only a fraction of one half or more shall be counted as one. Where the computation of required parking for a building with more than one class of use results in multiple fractional numbers, such fractions shall be carried to the final sum.
- 6.34 Parking Space Size Allocation. In all parking facilities required to have five or more spaces, a combination of regular and compact spaces may be provide; however, no more than fifty (50) percent of the required spaces shall be designed for compact cars (as specified in Subsection 6.42). All off street parking facilities shall contain spaces designed for handicapped access. The number of such spaces shall be determined by the requirements of the currently applicable "Rules and Regulations of the Architectural Barriers Board of the Commonwealth of Massachusetts."
- 6.35 Relief from Parking Requirements. Any required amount of parking may be reduced by issuance of a special permit from Board of Zoning Appeals, as provided below. However, handicapped parking required by Subsection 6.34, bicycle parking required by Subsection 6.37, and commercial vehicle parking required by Subsection 6.31.5 shall not be reduced from the original requirement. The parking maximum limitation may be exceeded only with the grant of a special permit from the Planning Board, as provided below, subject to the provisions with regard to Gross Floor Area as provided in Section 6.31.3.
- 6.35.1 Reduction of Required Parking. Any minimum required amount of parking may be reduced only upon issuance of a special permit from the Board of Zoning Appeals. A special permit shall be granted only if the Board determines and cites evidence in its decision that the lesser amount of parking will not cause excessive congestion, endanger public safety, substantially reduce parking availability for other uses or otherwise adversely impact the neighborhood, or that such lesser amount of parking will provide positive environmental or other benefits to the users of the lot and the neighborhood, including specifically, among other benefits, assisting in the provision of affordable housing units. In making such a determination the Board shall also consider whether or not less off street parking is reasonable in light of the following:
 - (1) The availability of surplus off street parking in the vicinity of the use being served and/or the proximity of an MBTA transit station.
 - (2) The availability of public or commercial parking facilities in the vicinity of the use being served provided the requirements of Section 6.23 are satisfied.
 - (3) Shared use of off street parking spaces serving other uses having peak user demands at different times, provided that no more than seventy-five (75) percent of the lesser minimum parking requirements for each use shall be satisfied with such shared spaces and that the requirements of Subsection 6.23 are satisfied.

Example:

Office and Theatre uses with peak user demands at different times. Office requires a minimum of one hundred and fifty (150) spaces and the theatre requires a minimum of one hundred (100). Seventy-five (75) percent of the lesser minimum requirement is seventy-five (75) (75% of 100). Therefore seventy-five (75) spaces can be shared but twenty-five (25) (100-25) would still be required, making the total amount or required parking for both uses (150 + 25) one hundred and seventy-five (175).

- (4) Age or other occupancy restrictions which are likely to result in a lower level of auto usage; and
- (5) Impact of the parking requirement on the physical environment of the affected lot or the adjacent lots including reduction in green space, destruction of significant existing trees and other vegetation, destruction of existing dwelling units, significant negative impact on the historic resources on the lot, impairment of the urban design objectives of the city as set forth in Section 19.30 of the Zoning Ordinance, or loss of pedestrian amenities along public ways.
- (6) The provision of required parking for developments containing affordable housing units, and especially for developments employing the increased FAR and Dwelling unit density provisions of Section 11.200, will increase the cost of the development, will require variance relief from other zoning requirements applicable to the development because of limitations of space on the lot, or will significantly diminish the environmental quality for all residents of the development.
- **6.35.2** Exceeding Maximum Allowed Parking. Any maximum allowed amount of parking may be exceeded only upon issuance of a special permit from the Planning Board. Any parking area in excess of the maximum limitation will have an impact on calculation of gross floor area as provided at Section 6.31.3. The Planning Board shall grant a special permit to allow exceedance of a maximum limitation only upon making the following determinations:
 - (1) Reasonable parking and transportation demand management measures are being implemented to reduce the need for the additional off street parking;
 - (2) The additional spaces reflect parking demand that exceeds that which is common for this use as categorized in Section 6.36, owing to unique characteristics of the users or the activity that result in a high level of automobile parking demand;
 - (3) The additional parking demand cannot reasonably be accommodated through contract or other arrangement making use of available off-site parking;
 - (4) The additional parking will provide positive environmental or other benefits to the users of the lot, to the neighborhood and the City which outweigh adverse effects, after consideration of the following: congestion, traffic increases on residential

streets, danger to public safety or deterioration of travel conditions for pedestrians, cyclists or users of public transit.

In its decision the Planning Board shall cite evidence supporting its determinations, and may impose such conditions as are necessary to mitigate all negative impacts on the neighborhood and the environment which would otherwise result from the greater allowed amount of parking.

6.36 Schedule of Parking and Loading Requirements. Off street parking shall be provided as shown in the following table. Where one entry is given in the table, it is the minimum requirement. All square foot measurements refer to gross floor area unless specified otherwise. The abbreviation "d.u." means dwelling unit. The abbreviation n/a means not applicable. In cases where a requirement is expressed in number of seats, twenty (20) square feet of public floor area shall equal one seat if there are no fixed seats. The final column of the table contains the loading requirement standard applicable under Section 6.80 for each use.

Parking Table Footnotes

- 1. Required parking may be reduced if a special permit is granted by the Board of Appeals upon determination that the criteria of Subsection 6.35 will be satisfied.
- 2. See also Section 11.16.
- 3. Special permit granting authority may require visitor spaces in excess of the minimum requirement.
- 4. The requirement for elderly oriented housing may be reduced below the requirement specified in the table but not below one space per four dwelling units.
- 5. Additional parking spaces shall be provided for public restaurants in excess of two thousand (2000) square feet for a hotel or motel containing up to one hundred (100) rooms, in excess of five thousand (5000) square feet for one containing between one hundred and one (101) rooms and two hundred and fifty (250) rooms, and eight thousand (8,000) square feet in one containing more than two hundred and fifty (250) rooms. The number of such spaces shall equal fifty (50) percent of the requirement for such uses specified in Subsection 6.36.5. Additional parking spaces shall also be provided for function rooms in an amount equal to one space per three hundred (300) square feet of floor area contained in such rooms.
- 6. The amount of parking required for this use shall be at the discretion of the special permit granting authority. In making its determination of required parking, the Board shall consider the size of the staff customarily occupying the premises, the nature of the client, resident, or customer population and the extent to which additional off street parking will be detrimental to the physical character of the neighborhood.
- 7. The required number of spaces shall be reduced by not more than fifty (50) percent if the place of worship is located within five hundred (500) feet of any public parking facility or any other parking facility where an equivalent number of spaces are available without charge during the time of services.
- 8. The requirement for areas devoted to fabrication shall be based on the parking requirement for the applicable industrial use category listed in Subsection 6.36.7 or 6.36.8.
- This requirement shall not apply to accessory employee cafeterias.
- 10. A queue line for five (5) cars shall be provided for each window, bay, or other service providing unit. Such unit shall not block any parking spaces and shall be in addition to other applicable requirements.
- 11. A queue line for three (3) cars or comparable loading or live parking area shall also be provided for dropping off and picking up students.
- 12. Providing that the establishment is located in a structure also containing nonretail uses, and that no establishment shall exceed two thousand five hundred (2,500) square feet of gross floor area.
- 13. In Residence C, C-1, C-2, C-2A, C-2B, C-3, C-3A districts the amount of parking required for this use may be reduced at the discretion of the Board of Zoning Appeal in accordance with Section 4.28.
- 14. No accessory parking or loading shall be required for any permitted nonresidential use in Business A-3 district.

- **6.37** Bicycle Parking. Off street parking of bicycles shall be provided as follows:
- **6.37.1** For multifamily residences there shall be one bicycles space or locker for each two dwelling units or portion thereof.
- **6.37.2** For all other uses, except those exempted in Subsection 6.37.4, there shall be one bicycle parking space for each ten (10) automobile parking spaces or fraction thereof required in Subsection 6.36.
- **6.37.3** Uses allowed to have reduced parking by special permit under Subsection 6.35 shall nevertheless be required to provide bicycle spaces or lockers in the amount of one for each ten (10) automobile parking spaces or fraction thereof that would otherwise be required for such use in Subsection 6.36.
- **6.37.4** No accessory bicycle parking shall be required to serve the following uses as listed in the Section 6.36, Schedule of Parking and Loading Requirements: 6.36.1(d), (e), and (f); 6.36.3 (j) (3); 6.36.5 (j) and (l) (1); 6.36.6 (g), (h), and (i); 6.36.7 (d), (g), and (h).

6.40 DESIGN AND MAINTENANCE OF OFF STREET PARKING FACILITIES

- 6.41 Purpose. The regulations governing the design and maintenance of off street parking facilities are intended to protect the health, safety and welfare of the users of the parking facility and of abutting properties, including pedestrians and motorists. Therefore, the regulations herein provide for internal and perimeter landscaping, planting, walls, fences and other improvements to reduce noise, glare or reflection from autos, lights, fumes and the like, and minimum standards for parking space and aisle dimensions to ensure safe traffic circulation within the parking facility and from entrances and exits.
- **6.42** *Dimensions for Off Street Parking Spaces.* The minimum dimensions for off street parking spaces, exclusive of drives and maneuvering spaces, shall be as follows:

			Minimum		
Space	Equivalent 90° Width	Equivalent 90° Depth	Vertical Clearance	Angel of Parking	Width of Aisles
Regular	8 1/2 feet	18 feet	7 1/2 feet	60°	22 feet
Compact Car	7 1/2 feet	16 feet	7 1/2 feet	60°	20 feet
Handicapped	12 feet	18 feet	7 1/2 feet	60°	22 feet

- 6.43 Access for Off Street Parking Facilities. Off street parking facilities shall have maneuvering areas and appropriate means of vehicle access to a street and shall be so designed as not to constitute a nuisance, hazard, or unreasonable impediment to traffic.
- 6.43.1 All parking spaces within the Business B-1 and Business B-2 districts shall be both covered and enclosed. All vehicle access for office and retail uses in those districts shall be from Massachusetts Avenue or from a side street perpendicular to it that will allow traffic flow toward Massachusetts Avenue. The open area of any lot in the Business B-1 and Business B-2 districts devoted to vehicular movements such as driveways shall be not more than the minimum necessary for vehicular access to covered and enclosed parking.

- **6.43.2** The layout of parking spaces shall permit entering and exiting without moving any other vehicles parked in other spaces except where more than one space is provided for any dwelling unit, such spaces may be located in tandem to the required parking spaces for that dwelling unit.
- **6.43.3** Curb cuts for off street parking facilities shall comply with the following standards:
 - (a) In Residential districts, the maximum width of a curb cut shall be twenty (20) feet at the street line.
 - (b) In Open Space, Business, Office and Industrial districts, the maximum width of a curb cut shall be thirty (30) feet.
 - (c) No more than one curb cut per lot for lots with less than one hundred (100) feet of frontage shall be allowed. A maximum of one curb cut for every one hundred (100) feet of street frontage or portion thereof shall be allowed for lots having frontage in excess of one hundred feet.
- **6.43.4** Driveways for off street parking facilities shall comply with the following standards:
 - (a) The minimum width for a one way driveway shall be ten (10) feet.
 - (b) No driveway curb cut shall be located closer than twenty five (25) feet to a street intersection or within fifteen (15) feet of a crosswalk.
 - (c) The grade and design of any driveway providing access to an off street parking facility shall permit a clear view, to the driver of any car exiting from the facility, of traffic on the street and of pedestrians.
- **6.43.5** The Board of Zoning Appeal may grant a special permit modifying the provisions of this subsections 6.43 in accordance with the following conditions:
 - (a) The provisions for layout of parking spaces in paragraph 6.43.2 may be modified where there is a valet parking arrangement for an off street parking facility.
 - (b) The maximum curb cut width specified in paragraphs 6.43.3 (a) and 6.43.3 (b) may be modified if the Board determines that an increased curb cut width would facilitate traffic and safety.
 - (c) The maximum of one curb cut for every one hundred (100) feet of street frontage as required in paragraph 6.43.3 (c) may be modified if the Board determines that traffic and safety would be facilitated by exceeding this maximum.
 - (d) The distance of driveways from street corners or crosswalks as required in paragraphs 6.43.4 (b) may be modified if the Board determines that an alternate arrangement would better facilitate traffic and safety.
- **6.43.6** The Board of Zoning Appeal may grant a special permit authorizing owners of adjacent properties to establish common driveways under mutual easements but such special permit shall not become effective until an appropriate easement has been duly recorded at the Middlesex County Registry of Deeds.
- 6.44 Layout of Off Street Parking Facilities. Any parking facility located within a structure, unless it is completely underground, must conform to the yard requirements for the zoning

district in which it is located. On grade, open parking spaces may be located in required yards only as provided in this Subsection 6.44.

- **6.44.1** Setbacks for on grade open parking facilities shall be provided as follows:
 - (a) No on grade open parking space shall be located within ten (10) feet of that portion of a building wall containing windows of habitable or occupiable rooms at basement or first story. However, on grade open parking spaces serving one, two, or three family dwellings may be located within five (5) feet of that portion of such building wall.
 - (b) Except for one, two, or three family dwellings existing at the time of the effective date of this Ordinance or amendment thereto, no on grade open parking space or driveway shall be located within five (5) feet of any side or rear property line.
 - (c) No on grade open parking space shall be located within a required front yard setback
 - (d) The area between the required parking setback line and the building or lot line shall be landscaped and maintained in accordance with the requirements of Subsection 6.48.
 - (e) No on grade open parking shall be allowed in a Residence C-2A district within one hundred and twenty five (125) feet of a Residence A-1, A-2, B, C, C-1, C-2, or C-2B District.
 - (f) In an Industry C district, no parking lot shall be located within fifty (50) feet of a residential district or within twenty five (25) feet of an open space district, a park or public recreation area or the right of way of a designated parkway.
 - (g) The Board of Zoning Appeal may grant a special permit to allow for modification of the requirements in 6.44.1 (a) or (b) if site specific factors favor such modification.
- **6.44.2** All roads, streets, alleys, sidewalks and other public rights of way and all landscaped areas shall be protected from vehicular overhang by wheel bumpers, curbs or other suitable method except those off street parking facilities provided for one, two or three family dwellings.
- 6.44.3 Off street parking facilities shall be marked so as to indicate clearly the space to be occupied by each vehicle, in accordance with the dimensions specified in Subsection 6.42 and including directional arrows and traffic signs as necessary for traffic control. Such markings shall be maintained so as to be plainly visible.
- 6.45 Drainage, Surfacing, and Maintenance. All sections of off street parking facilities which are not landscaped according to the requirements of Subsection 6.48 shall be graded, surfaced (preferably with durable pervious paving materials such as modular paving blocks, bricks or similar materials), and maintained to the satisfaction of the Superintendent of Buildings to the extent necessary to prevent nuisance of dust, erosion, or excessive water flow onto any public way or onto another lot.
- **6.45.1** A parking space for a one, two, or three family dwelling may consist of two parallel paved strips, each at least eighteen (18) feet long separated by a landscaped area.
- **6.45.2** Off street parking areas shall be kept plowed, clean and free from rubbish and debris. All fences, barriers, walls, landscaping and lighting shall be maintained and kept repaired or replaced with facilities satisfying the requirements of this Section 6.40.

- 6.46 Lighting. Off street parking facilities which are used at night shall be provided with adequate lighting installed and maintained in such a manner so as not to reflect or cause glare on abutting or facing residential premises nor to cause reflection nor glare which adversely affects safe vision of operators of vehicles moving on nearby streets. A recommended standard for lighting is a minimum intensity of one (1) foot candle on the entire surface of the parking facility.
- 6.47 Screening. Off street parking facilities containing five or more spaces and not in a structure shall be effectively screened from abutting streets and lots. However, such screening shall not obstruct vehicle sight distances, entrances and exits.
- **6.47.1** Screening shall consist of one or a combination of the following:
 - (a) A strip at least five (5) feet in width of densely planted shrubs or trees which are at least two (2) feet high at the time of planting and are of a type that may be expected to form, within three (3) years after time of planting, a continuous, unbroken, year round visual screen.
 - (b) A wall, barrier, or fence of uniform appearance. Such wall, barrier, or fence may be opaque or perforated provided that not more than fifty (50) percent of the face is open. The wall, barrier or fence shall be at least four (4) feet and not more than six (6) feet in height.
- **6.47.2** The screening as required in this Subsection 6.47 shall be located so as not to obstruct vehicle sight distances, entrances and exits. Such screening shall not be higher than two (2) feet within thirty (30) feet of an intersection or ten (10) feet of a driveway. In no case shall the screening of parking facilities from abutting streets exceed four (4) feet in height.
- **6.47.3** Every effort shall be made to retain existing trees. Removal of any tree exceeding six (6) inch caliper to accommodate construction of a parking facility is discouraged.
- **6.47.4** Perimeter landscaping required for screening may include any landscaped yard area otherwise required.
- **6.47.5** Screening shall be continuously maintained so as to effectively serve the purpose for which it is intended. No advertising devices of any kind shall be allowed on screening.
- **6.47.6** Screening shall be continuous except for required access.
- 6.47.7 In residential districts, any on grade, open parking area located in a front yard shall provide a visual definition of the front lot line and separation of public from private space in keeping with the appearance and character of the existing streetscape. Such definition shall be achieved by using a change of ground materials at the front lot line and by installing at least one of the following: fences, plantings, walls, or stone monuments which mark the transitions from street or sidewalk to residential lot.

- **6.47.8** Screening requirements may be waived in the following cases:
 - (a) If said parking facility is already effectively screened by an existing building, wall, fence, or hedge on an adjoining lot and within five feet of the common property line, screening shall not be required so long as such adjoining screening is maintained.
 - (b) If said parking facility is already effectively screened by a natural terrain feature, railroad tracks, or change in grade.
 - (c) If said parking facility abuts another parking facility under different use or ownership, a landscaped planting strip at least five (5) feet in width may be used in lieu of screening along the common property line.
- 6.48 Landscaping. For the purpose of this Section 6.40, landscaping shall consist of any of the following or combination thereof: grass, ground covers, shrubs, vines, hedges, or trees; and nonliving durable material commonly used in landscaping, such as but not limited to rocks, pebbles or wood chips, but excluding asphalt or concrete. Required screening elements as specified in Subsection 6.47.1(a) and (b) may be allowed in perimeter landscaped areas.
- **6.48.1** On grade, open parking facilities which contain five (5) or more parking spaces shall be landscaped in accordance with the following requirements:
 - (a) At least five percent of the interior area of the parking facility shall be landscaped. This does not include the perimeter planting provided for beautification or to satisfy screening requirements.
 - (b) Each planting area shall be at least twenty five (25) square feet in area and have no dimension less than five feet.
 - (c) Each planting area shall contain at least one tree and the facility as a whole shall contain at least one tree for every ten parking spaces.
 - (d) Trees used to satisfy parking lot landscaping requirements shall be a minimum of three (3) inch caliper at planting and shall be suitable for location in parking lots. Recommended species are listed in Section 11.16.4(4)(b).
 - (e) Existing trees shall be preserved wherever possible.
 - (f) Existing and new trees shall be protected by bollards, high curbs or other barriers sufficient to minimize damage.
 - (g) Extensive unbroken paved areas in large on grade open parking facilities shall not be permitted. In parking lots containing twenty five (25) or more spaces, a row shall contain no more than fifteen contiguous parking spaces without a densely planted landscaped buffer of at least the dimensions of one space.
- 6.48.2 No regular certificate of occupancy shall be issued unless an inspection by a representative of the Inspectional Services Department establishes that the landscaping meets the requirements provided herein. Pending issuance of a regular certificate of occupancy, a temporary certificate may be issued for such period as the Superintendent of Buildings may designate but no longer than one year.
- 6.49 Design of Bicycle Parking spaces. Bicycle parking spaces shall be provided in accordance with the amounts required by Section 6.37 and with the design regulations in this Section 6.49.

- 6.49.1 Each bicycle parking space shall be sufficient to accommodate a cycle at least six (6) feet in length and two feet wide, and shall be provided with some form of stable frame permanently anchored to a foundation to which a bicycle frame and both wheels may be conveniently secured using a chain and padlock, locker or other storage facilities which are convenient for storage and are reasonably secure from theft and vandalism. The separation of the bicycle parking spaces and the amount of corridor space shall be adequate for convenient access to every space when the parking facility is full.
- 6.49.2 When automobile parking spaces are provideed in a structure, all required bicycle spaces shall be located inside that structure or shall be located in other areas protected from the weather. Bicycle parking spaces in parking structures shall be clearly marked as such and shall be separated from auto parking by some form of barrier to minimize the possibility of a parked bicycle being hit by a car.
- **6.49.3** Bicycle parking spaces shall be located near the entrance of the use being served and within view of pedestrian traffic if possible, and shall be sufficiently secure to reasonably reduce the likelihood of bicycle theft.
- **6.49.4** Changes in the requirements of this section, consistent with the intent of this article, may be approved by the Board of Zoning Appeal for an individual building by special permit.

6.50 PARKING PLAN INFORMATION REQUIREMENTS

- Any application for a building permit for construction of a new building or for an alteration of an existing building increasing the gross floor area or intensity of use, (as specified in Subsection 6.12b), or for a certificate of occupancy where no building permit is required, shall be accompanied by one or more plans drawn to scale and fully dimensioned showing any parking and/or loading facilities to be provided.
- **6.52** Every such plan for a proposed new, altered, or expanded use which provides five or more parking spaces shall indicate thereon the location of and provision for:
 - (1) parking spaces and access routes (6.34 and 6.40)
 - (2) curbing and wheel stops (6.44.2)
 - (3) pavement markings (6.44.3)
 - (4) surfacing (6.45)
 - (5) screening and landscaping (6.47 and 6.48)
 - (6) lighting (6.46)
 - (7) drainage (6.45)
 - (8) bicycle parking (6.49)
 - (9) loading areas (6.60)
 - (10) other pertinent data reasonably required by the Superintendent of Buildings or his designee.

- 6.53 The Superintendent of Buildings may forward a copy of the plan indicating off street parking and loading arrangements to the Community Development Department and the Department of Traffic and Parking for review and comment. The departments must return the plan to the Building Department with written approval or recommended modifications within a period not to exceed five (5) business days from the date of receipt.
- 6.54 Any land use involving a fleet of vehicles for operation of the use shall be required to provide information demonstrating provision of space for such fleet before issuance of an occupancy permit for said use.
- 6.55 In the event that the plan for off street parking and loading arrangements requires a special permit or variance, an applicant for such approvals shall submit the following information to the permit or special permit granting authority to assist in their determination:
 - (1) A written statement describing in detail the parking generating characteristic of the land use.
 - (2) A plan drawn to scale showing the various uses within respective floor areas of the building of structure.
 - (3) The number of employees during largest work shift.
 - (4) The number of customers, patrons or other visitors expected to be served.
 - (5) Any other statements to show the actual extent of off street parking space required or generated by particular use.

6.60 PURPOSE AND INTENT OF LOADING REQUIREMENTS

6.61 It is the intention of this Ordinance that all buildings and uses requiring the delivery of goods as part of their function be provided with necessary space for off street loading.

6.70 APPLICATION OF LOADING REQUIREMENTS

- 6.71 No application for a permit for the erection of a new building, for the activities described in Subsection 6.12(b) and (c), or for the development of a land use, shall be approved, unless it indicates a plan for off street loading facilities required to comply with the regulations set forth in this Article.
- 6.72 Where a building existing on the effective date of this Ordinance is altered or extended in such a way as to increase the gross floor area, only the additional gross floor area shall be counted in computing the off street loading requirements.
- 6.73 Where a building or lot is used by two activities that fall into different loading facility categories under Subsection 6.36, the facilities required shall be the sum of the requirements for the individual loading facility categories, including fractional requirements as specified in Subsection 6.74 of the different categories. Where a building or lot is used by three or more activities that fall into different loading facility categories under Subsection 6.36, the facilities required shall be one half the sum of the requirements for the individual loading facility categories, including fractional requirements as specified in Subsection 6.74 for the different categories.
- 6.74 The required amount of loading facilities required to serve an institutional use listed in Subsection 6.36.3b may be calculated in aggregate for a use or uses on a lot and any lot

- contiguous thereto. However, such institutional use shall be located within a five (5) acre area containing one or more lots, contiguous except for streets, owned by a single institution.
- Where the computation of total required loading bays results in a fractional number, only the fraction of one half or more shall be counted as one.

6.80 REQUIRED AMOUNT OF LOADING FACILITIES

- **6.81** Off street loading facilities shall be provided based on the category of land use and the area of that use.
- The loading facility category shall be as listed in Subsection 6.36. The required number of loading bays shall be determined by the schedule in Subsection 6.83.
- **6.83** Minimum Number of Off Street Loading Bays

Gross Floor Area (in thousands of square feet)

Loading Facility Category	Area at which First Bay is Required	Area at which Second Bay is Required	Incremental Area for which Each additional Bay is Required Beyond the Second
Α	5	40	50
В	10	20	50
С	10	25	40
D	10	40	50
Е	10	100	100
F	10	100	200

6.90 LOCATION AND LAYOUT OF LOADING FACILITIES

- 6.91 Where a building or lot contains uses requiring compliance with loading facility categories C, D, E, and F, the first required bay shall be no less than ten (10) feet in width, thirty (30) feet in length and fourteen (14) feet in height. Each additional required loading bay for categories C, D, E, and F and any loading bay required by categories A and B shall be no less than ten (10) feet in width, fifty (50) feet in length, and fourteen (14) feet in height, such requirements to be exclusive of drives and maneuvering space.
- All loading bays, drives, and a maneuvering space shall located entirely on the lot with immediate and direct ingress to the building intended to be served. A bay need not be enclosed in a structure provided any yard area used as a loading bay shall not infringe on front, side, and rear yard requirements as indicated in Article 5.000. All such facilities shall be designed with appropriate means of vehicular access to a street or alley as well as maneuvering area, and no driveways or curb cuts shall exceed thirty (30) feet.

- 6.93 Off street loading bays may be enclosed in a structure and must be so enclosed if located within fifty (50) feet of a Residence District where the use involves regular night operation, such as that of a bakery, restaurant, hotel, bottling plant, or similar uses. Any lighting provided shall be install in a manner that will prevent direct light from shining onto any street or adjacent property.
- 6.94 All accessory driveways and entranceways shall be graded, surfaced, drained and suitably maintained to the satisfaction of the Superintendent of Buildings to the extent necessary to avoid nuisances of dust, erosion, or excessive water flow across public ways.
- 6.95 Loading facilities shall not be reduced in total extent of usability after their installation, except when such reduction is in conformity with the requirements of the Article. Such facilities shall be designed and used in such a manner as at no time to constitute a nuisance or hazard or unreasonable impediment to traffic.
- **6.96** Adoption of the Recommendations of the Regional Truck Study dated September 2001.

All trucks 2.5 tons or more in gross weight traveling on streets under the control and jurisdiction of the City of Cambridge are prohibited from using any City streets between the hours of 11:00 p.m. and 6:00 a.m., except for the following signed and designated truck routes or except when a local delivery or pick-up requires traveling off of the following signed and designated truck routes:

Brattle Street between Massachusetts Avenue and Eliot Street;

Eliot Street between Brattle Street and Mount Auburn Street; Mount Auburn Street between Eliot Street and Massachusetts Avenue; the entirety of JFK Street

the entirety of Main Street

the entirety of Galileo Galilei Way;

Binney Street between Galileo Galilei Way and Land Boulevard;

the entirety of First Street:

Cambridge Street between First Street and the O'Brien Highway;

Broadway between Galileo Galilei Way and the Longfellow Bridge; and

Vassar Street between Main Street and Massachusetts Avenue.

In addition, the following signed and designated Hazardous Materials (HAZMAT) routes shall be open to Hazardous Material carriers at all times:

the entirety of River Street; and

the entirety of Western Avenue.

All trucks 2.5 tons or more in gross weight traveling on the following streets under the control and jurisdiction of the City of Cambridge are prohibited from using them at all times, except for a delivery or pick-up on these streets:

the entirety of Putnam Avenue;

the entirety of Cardinal Medeiros Avenue; and

the entirety of Warren Street.

Nothing herein shall affect in any way restrictions on trucks currently in effect. Nothing herein shall affect the use of roadways under the control and jurisdiction of the Metropolitan District Commission or any state numbered routes, including the following:

the entirety of Massachusetts Avenue (Route 2A);

the entirety of Peabody Street (Route 2A);

the entirety of the O'Brien Highway (Route 28);

the entirety of Concord Parkway (Route 2);

the entirety of the Alewife Brook Parkway and a portion of Concord Avenue designated as Routes 2, 3 & 16;

the entirety of the Fresh Pond Parkway (Routes 2, 3 & 16);

the entirety of Memorial Drive (Routes 2 & 3);

the entirety of Land Boulevard;

the entirety of Aberdeen Avenue (Route 16); and

portions of Huron Avenue and Mount Auburn Street designated as Route 16.
